Certified Ethical Hacker   Teaching Planet

I evaluate security standards in computer systems by searching for weaknesses and security holes in the targeted systems. The same knowledge and tools are used as a malicious (unethical) hacker or hacker, but here hacking is practiced in a legal and legitimate way to assess the security posture of the target system.

2024-2-19

web development   Createivo

Developing and building websites for the World Wide Web or the Intranet
